# GEOLUX PARKLINE

Smart LED Solution

---

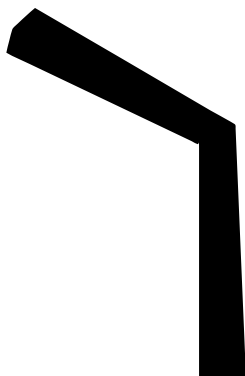

# Sophisticated design, high quality, economical and environmentally friendly solutions

GeoLUX ParkLine luminaires are a tool for architects for effective design of the environment. With minimalist design the luminaires are distinctly closer to the taste of the most demanding customers. They provide wide range of lighting solutions that fulfill comprehensive needs of the urban environment. With ParkLine we can use classic 'L' lighting solution, 'T' lighting solution (both sides) and asymmetric design (illumination of the road on one side and footpath on the other at the same time).

Height of installation: 0,9 m - 8 m

Power consumption: 10 W - 150 W
